About HordeZ

If you are looking for a on-rails arcade experience that blends between classics like Doom, Left 4 dead and House of the Dead then we got you covered! Fast and simple gameplay that will bring you into a creepy world of zombies and demons. Show your skills to the world through our global leadboard system! Bring a friend in multiplayer Co-Op game and send those zombies flying back to hell!

Playing the role of an elite force of high-tech mercenaries you are sent to deal with the demonic incursion spreading across the world. The demonic forces entering the world have taken over the bodies and minds of the population, turning them into mindless slave hordes controlled by powerful demonic entities.

New portals to the demonic world are opening at an alarming rate and it's up to you to close them by any means necessary and save what's left of humanity, destroy the rest. The game offers a non-stop carnage experience in full room scale virtual reality. Every shot you make is entirely up to your own aiming skills. Headshots will take out the zombies stone cold so you better be good at it.

Blowing up zombies and demons have never been this much fun. A full set of weapons are available like katana, guns, machineguns and grenades will keep the baddies from wrecking your day!

Last update was more than a year ago. I believe it's safe to assume that the game is abandoned by the devs.. Poor graphics. Stupid AI. Boring Levels. Confusing and nonintuitive menu.
I don't recommend this game, even if it's on sale!
